Dr. G. C. Smith, Technical Coordinator
Jones & Laughlin Steel Corporation
900 Agnew Road
Pittsburgh, PA 15227

Dear Doctor Smith:

Re: Variance for Delisted Hazardous Waste

Your facility's petition for a variance for delisted hazardous waste has been reviewed by staff. It is staff's recommendation that this variance be granted with certain provisions.

By the authority delegated to me by the Environmental Management Board on February 19, 1982, I am granting this variance for the waste material as outlined in your petition and subject to the following provisions:

1. The variance will be for a period of one (1) year per IC 13-7-7-6.
2. The waste material must go to a state permitted solid waste disposal facility.
3. Revocation of any temporary or final exclusion granted by the U.S. EPA will be sufficient grounds for immediate cancellation of this variance.

The waste material must be covered on a daily basis to prevent possible photodecomposition.

Contact Mr. George Oliver, Division of Land Pollution Control, for assistance in locating a suitable disposal facility. Mr. Oliver may be reached at 317/633-0213 for further information.

Very truly yours,

Ralph C. Pickard
Technical Secretary
